DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-13, drawn to method of identifying inhibitor compounds.

Group II, claims 14-18 and 20-22, drawn to inhibitor and pharmaceutical composition.

Group III, claim 19, drawn to method of mapping nuclear receptor interaction domains.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The method of Group I has a special technical feature (the assay components, including a potential inhibitor compound) which

Art Unit: 1636

is not present in the other two groups. The inhibitor and pharmaceutical composition of Group II has a special technical feature, a specific, functional inhibitor, which is not present in the other two groups. The method of Group III has a special technical feature, analysis of a sequence for a signature motif, which is not present in the other two groups.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species types are as follows:

1. the specific signature sequence used in the method (pick one specific sequence).
2. the specific coactivator used in the method (pick one from claim 8, for example).
3. the specific transcription factor (pick one specific transcription factor).
4. the particular inhibitor (pick one specific inhibitor, such as a sequence).

Art Unit: 1636

Applicant is required, in reply to this action, to elect a single species (for each species type) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Group I, claims 1-13, correspond to species types 1-3.

Group II, claims 14-18 and 20-22, correspond to species type

4.

The following claim(s) are generic: claims 1-18 and 20-22.

Art Unit: 1636

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Each species type is comprised of protein species that relate to motifs, coactivators, and transcription factors that are from unrelated genes which interact with proteins from other unrelated genes, and thus they lack a common special technical feature, their specific sequences which are not related to each other.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
